- Global, diversified healthcare company
- 80 years of parenteral expertise driven by a well recognized global brand
- \$12.6 billion global market leader
- Approximately 49,700 employees globally
- More than 50 manufacturing facilities across six continents

For you this translates into:

- Broad portfolio of sterile manufacturing capabilities
- Global experience and expertise
- A financially stable partner
- Environmentally conscious provider

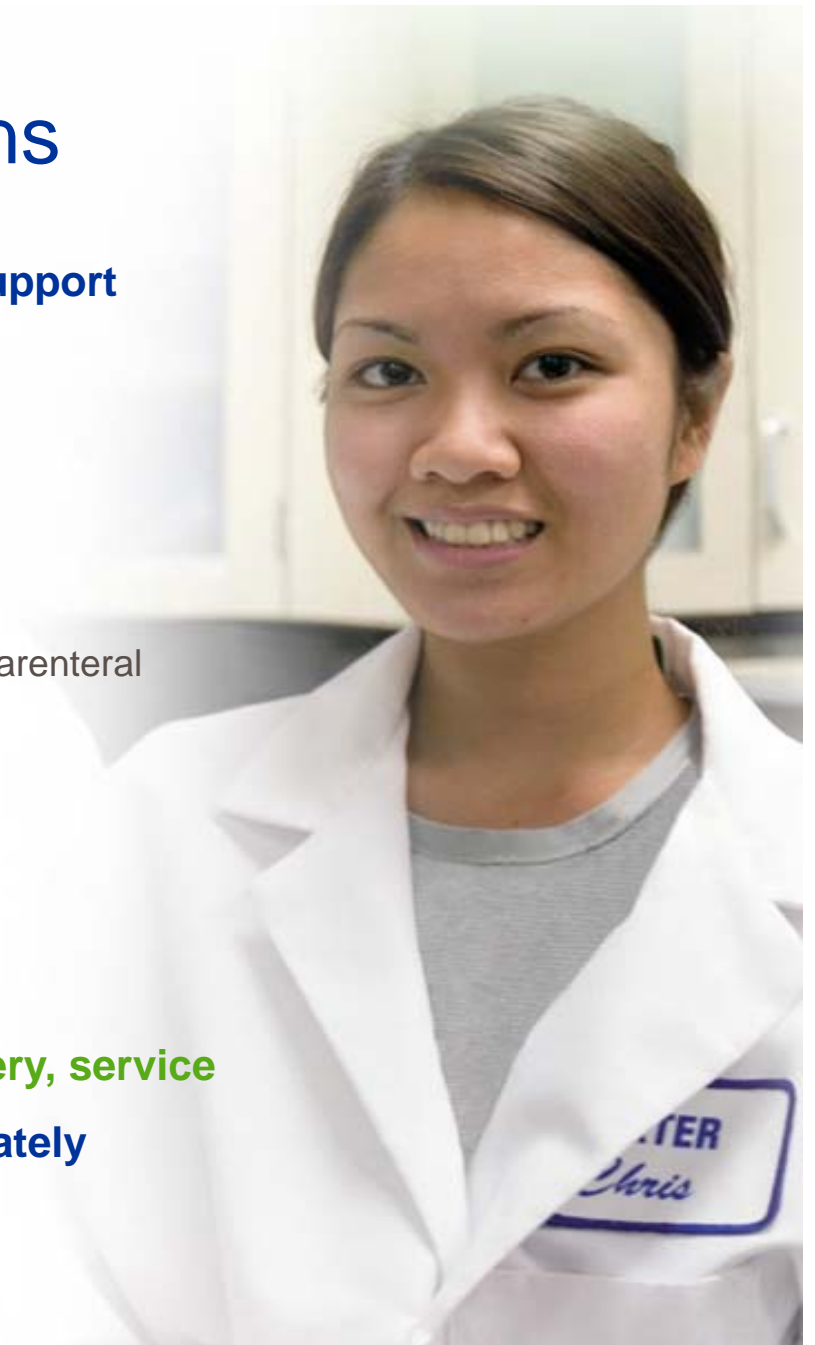

About BioPharma Solutions

We partner with pharmaceutical companies to support their commercialization objectives by providing:

- Scientific expertise
- Sterile manufacturing solutions
- Parenteral delivery systems
- Customized support services
- Diverse experience with a variety of drug categories and parenteral delivery systems
- Worldwide manufacturing capabilities
- Experience with worldwide regulatory agencies
- Quality systems

We provide our clients with confidence of delivery, service and integrity – knowing the work we do is ultimately vital to the patients you serve.

• Sterile Manufacturing Solutions

A broad portfolio to meet sterile needs.

Parenteral Delivery Systems

- Frozen Premix System
- Liquid Premix System
- BIO-SET Luer System

Complex Sterile Manufacturing

- Cytotoxics
- Highly Potent Compounds
- Biologics
- Cephalosporins/Penicillins
- Packaging

Traditional Sterile Manufacturing

- Prefilled Syringes
 - diluents for reconstitution
- Liquid Vials
- Lyophilized vials
- Cartridges
- Small Molecules
- Vaccines

Parenteral Delivery Systems

Safety, Simplicity & Convenience

BioPharma Solutions provides the delivery systems designed to improve compliance with safety guidelines and to reduce the potential for:

- Medication errors
- Medication contamination

Baxter provides a unique menu of packaging options to meet patient needs while growing your product's market advantage:

- Frozen Premix System
- Liquid Premix System
- BIO-SET Luer System

Complex Sterile Manufacturing

We can navigate complexity.

Parenteral manufacturing can be a complicated process. BioPharma Solutions brings experience in handling these complex sterile manufacturing challenges for:

- Cytotoxics
- Antibody Drug Conjugates (ADCs)
- Highly Potent Compounds
- Biologics
- Lyophilized Products

Traditional Sterile Manufacturing

Our approach to customization.

BioPharma Solutions' processes and systems, including high-speed contract manufacturing and automated inspection systems, are tailored to meet your parenteral needs.

We offer conventional sterile forms, including:

- Prefilled Syringes
- Liquid Vials
- Lyophilized Vials
- Cartridges
- Diluents for Reconstitution

Worldwide Facilities

Expansive Network.

Baxter has manufacturing sites across the globe in support of a diverse portfolio of delivery systems and manufacturing solutions.

Bloomington, Indiana, USA

Full-Service, Award-Winning Contract Manufacturing Facility

- Clinical development through commercial launch
- Lyophilization expertise with our Lyophilization Center of Excellence
- Experience with worldwide regulatory agencies
- Aseptic formulation, filling, and finishing services for:
 - Prefilled Syringes 0.5 mL–20 mL
 - Diluents for Reconstitution
 - Liquid Vials 2 mL–100 mL
 - Lyophilized Vials 2 mL–50 mL
 - Cartridges 1–3 mL

Round Lake, Illinois, USA

Best-in-Class Aseptic Solution Manufacturer

- Manufacturing of ready-to-use IV solutions
- Broadest portfolio of manufacturer prepared premixed drugs in the industry
- Decades of experience in parenterals development, manufacturing, and partnering

Halle/Westfalen, Germany

World-Class, Dedicated Manufacturer of Cytotoxic and Highly Potent Compounds

- Dedicated clinical through commercial production with integrated technologies and services
- Equipped with barrier technology
- Qualified cold chain storage: -70°C/-20°C/2-8°C/15-25°C
- Meets FDA, JP, and EU regulatory standards
- Environmental Health and Safety certification is according to ISO 14001
- Aseptic manufacturing of:
 - Vials
 - Lyophilizates 2 mL–100 mL
 - Liquid Vials 2 mL–200 mL
 - Powder filled Vials 6 mL–100 mL
 - Ampoules 1 mL–10 mL
 - Sterile crystallization Polyethylene bags (1kg–10kg)

Commitment to Partnering

We take partnering seriously.

- Partner to over 60 pharmaceutical clients
- Strong organizational capabilities to help ensure our partnership provides the value you deserve and respect

Focusing on results.

We are committed to:

- Providing empowered and knowledgeable client teams
- Fulfilling your expectations by meeting commitments

Applying successful partnership principles.

- Project Management
- Customer Service
- LEAN manufacturing methodology

Dedicated client teams.

- Composed of cross-functional experts
- Create transparency and alignment which can simplify the complex process of bringing your product to market

Confidence in Delivery

A photograph of a woman with long blonde hair, smiling warmly. She is wearing a white lab coat over a white top. Her arms are crossed. The background is a blurred clinical or laboratory setting with another person in a white coat visible in the distance. The overall tone is professional and positive.

Service

Integrity

Vital to the patients you serve
